

Program Outcomes for Organizational Leadership

The Organizational Leadership curriculum is designed so that students will be able to do the following upon successful completion of the program:

PLO 1 Ethical: Decision making in organizational and personal actions. Implement leadership concepts in decision making after developing a personal model for ethical leadership.

PLO 2 Engaged: Clearly and effectively communicate (orally and written) as an individual and in teams. Demonstrate effective and collaborative written and oral communication skills.

PLO 3 Encompassing: Promote multicultural sensitivity. Determine one's own identity, culture, and heritage and seek to learn more about others while confronting prejudices and discrimination.

PLO 4 Empowered: Prepare to execute. Broaden knowledge of a wider world and establish ability to deal with complexity, diversity, and change.
